## **DETAILED ACTION**

### ***Specification***

1. The disclosure is objected to because of the following informalities:

The description of a "lower profile height" on page 2 appears to be inaccurate in that such lower height of webs 12 and 13 is not shown in the figures. The webs are shorter horizontally but appear to be of the same height in Figures 3 and 4.

On page 2, line 24, it is thought that "make" should be changed to --makes--.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 3, it is not clear exactly how the central portion is considered to have a lower profile. On line 4, "side portions" has no clear antecedent basis. On the second to last line, "side flanges" has no clear antecedent basis. On the last line, the

Art Unit: 3612

recitation that the bent edge is bent "towards" the cover appears to be inaccurate as shown in Figure 3.

In claim 2, line 1, "side portions" has no clear antecedent basis. On line 2, "side rails" has no clear antecedent basis. On line 4, it is not clear exactly how the central portion is considered to have a lower profile. On line 5, "side portions" has no clear antecedent basis. On the second to last line, "side flanges" has no clear antecedent basis. On the last line, the recitation that the bent edge is bent "towards" the cover appears to be inaccurate as shown in Figure 3.

In claim 3, "lower one", "upper one", "side portions" and "crown" have no clear antecedent basis.

In claim 4, "upper side flange" and "lower side flange" have no clear antecedent basis.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-4, as understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Jonsson '797.

Jonsson discloses the claimed invention including hat profile 11 cover 12 and bent edges 17,18.

### ***Conclusion***

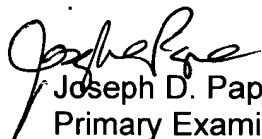

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references show other bumper constructions similar to that of the current invention.
